

AthletePal

Train Smarter. Track Better. Achieve More.

AthletePal is a full stack fitness web application that helps users plan workouts, track cardio sessions with interactive map routes, manage competitions and visualise progress over time.

 All-in-One Platform

 Track Progress Over Time

 Built for Athletes

KEY FEATURES

Workout Logging

Create reusable routines and log completed sessions with exercises, sets, reps and weight.

Cardio + Map Routes

Log runs, cycles and swims. Draw your routes on an interactive map or pick a saved public route.

Competition Tracking

Record upcoming and completed competitions with finishing positions and result times.

Statistics

View personal bests, training streaks and workout progression over time.

Training Groups

Join virtual training groups and train together towards a shared goal.

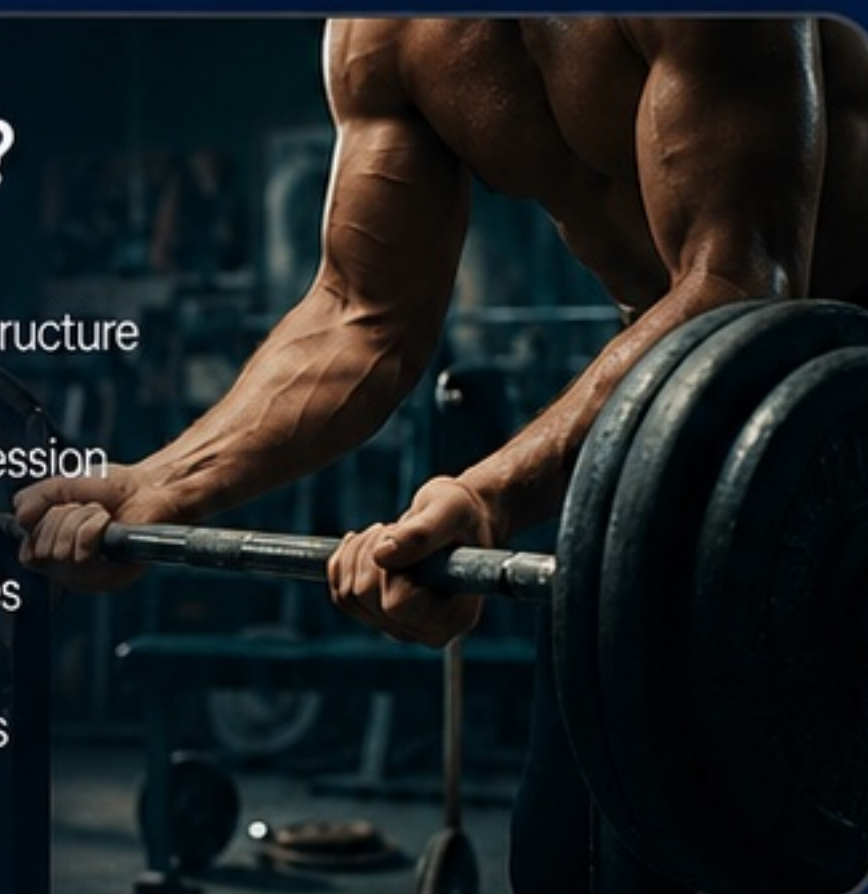

Profile Management

Manage personal details, body metrics and account settings properly.

Who is it for?

- ✓ Casual gym goers wanting structure
- ✓ Serious lifters tracking progression
- ✓ Cardio athletes logging routes
- ✓ People entering competitions

STANDOUT FEATURE

Draw, save and share your cardio routes on a real interactive map – or explore routes shared by others.
